COMMUNICATION

- English
Proficiency: Fluent
IELTS: Band 7.5

PROFILE

- Over **9 years** of experience
- Worked with internationally renowned companies.
- Specialized in **Photon Quantum** and **Fusion**, Amazon GameLift, and **Mirror** multiplayer.
- Specialized in writing **smart contracts** in Solidity and implementing **blockchain transactions** of Solana and Sequence.
- Keen eye on project structuring, editor scripting, and feature **finalization**.
- Demonstrated strong **leadership** skills and the ability to **collaborate**.
- Skilled in **multiplayer** and server-client development.
- project management tools such as Jira and ClickUp, Notion, Discord, and Slack

Muhammad Ahsan Ijaz

EXPERIENCED UNITY
GAME DEVELOPER

PROFILE

Senior Unity Developer at KAP Games

Remote

Feb 2024– Present

Project: [Captain & Company](#)

Working on:

- A renowned **crypto-based pirate ship game** with a war-based scenario between 2 factions to capture towers and the enemy base.
- The project was in MVP when I joined, and I implemented the **Talent Tree, Perk system, and Auction house**.
- Implemented **AI bosses and monsters** (Ocutopus, Kraken, Jellyfish, Golems). **Improved AI crew and ships** with intelligent maneuvers like (Ram, Pursuit, Patrol, Attack, and evade).
- wrote game mode using **Photon Quantum** with the waves system and collecting perks and loot in the **Pirate ship** game.
- Implemented a **Sequence SDK** to implement live inventory and a **Web3 transaction** system.
- Implemented an auction house where **selling or buying orders** were placed on the blockchain, and fetched other people's orders and the user's current **transaction history**.

Lead Unity Developer at Salvay

Hybrid. Lahore, Pakistan

Oct 2022– Jan 2024

Project: [MoonKarts](#)

[Video 1](#)

[Video 2](#)

Worked on:

- Used **Photon Quantum** to develop a 6-player **Kart Racing** game.
- Implemented a **Replay system** with Quantum to save JSON replay files and watch the game again.
- Implemented a flawless **card inventory system** to manage all game entities and create game presets.
- Integrated **Web3 APIs** to fetch data and do transactions for **minting NFTs** like fuels and cards on the Arcade Colony blockchain.

Project: [Gnomewars](#)

[Video](#)

Worked on:

- Developed a first-person shooter with **Mirror multiplayer**.

- Proven ability to deliver high-quality work on time

UNITY ASSETS API QUERY MASTER

[ASSET STORE LINK](#)

Simple API processing with a queue-based system and proper exception handling

EDUCATION

Bachelor of Science in Computer Engineering

University of Engineering and Technology, Lahore

GPA: 3.55/4.0

October 2016

SKILLS & TOOLS

- Unity Front End
- C# Programming
- VR / AR / MR
- ML Agents
- Photon Fusion
- Photon Quantum
- Unreal
- C++
- Node JS
- Photoshop
- Android Studio
- Swift Xcode
- PHP & MySQL
- Python
- XML Shader Scripting

- Implemented **custom walkable structure** and **unique guns**.
- Server deployment on private Docker

Tool & Technologies:

Unity 3D

Photon Quantum

Mirror Multiplayer

Web3

Lead Unity Developer at Arthur

Remote.

Feb 2021 – Jan 2024

Project: [Arthur - Virtual Office](#)

[Video 1](#)

[Video 2](#)

Worked on:

- Implemented **photorealistic avatar generation** with avatarSDK and suit-wearing in your virtual office.
- Performed **server-client optimization** to improve **spatial audio** and optimization of unnecessary server updates in large meetings.
- Created a **Pinboard feature** in which you can stick sticky notes, emojis, shapes, and documents for a clear view of what's going on.
- Implemented the **Speakerphone feature** for clear sound for your mentioned circle.
- **Integrated Jira boards** for viewing ticket lists and every detail, can create new, edit, delete, and comment on tickets **using direct Jira APIs**.

Tool & Technologies:

Unity 3D

Photon Quantum

Mirror Multiplayer

Jira APIs

Lead Unity Developer at NOBORDERz

Lahore, Pakistan

April 2020 – Feb 2021

Project: [XANA - Virtual social events platform](#)

[Video 1](#)

[Video 2](#)

Worked on:

- Built from scratch and published a **Virtual event organizing platform**
- Server – Client development with **Amazon GameLift** to support up to 200 persons per session.
- Developed organizer and visitor **roles and permissions**.
- Integrated live **YouTube streaming**.
- Published on five platforms, including Quest, Android, iOS, MAC, and Windows, with a **single code base**.

Tool & Technologies:

Unity 3D

Photon PUN

C#

Amazon GameLift

Senior Unity Developer at Fiver Rivers Technologies

Lahore, Pakistan

Apr 2018– Apr 2020

EXPERTISE

- Custom Server Development
- Editor Scripting
- Shader Scripting
- Prototyping
- Documentation
- Code Review
- Optimization
- Integration

SOFT SKILLS

- Exceptional communication
- Excellent team management
- Group dynamics
- Reflective listening skills
- Excellent pitching skills

ACHIEVEMENTS

- **CCNA**
Oct 2015
- **PROTOTYPE DEVELOPMENT**
Won in Aug 2015 and Aug 2017
- **HACKATHON**
Won 2016

Project: Sky Forge – Fighter Aircraft AI Brain Creation

[Video](#)

Worked on:

- Set up different AI training environments for **reinforcement learning**.
- Integrated **Mapbox** for real terrain training.
- Executed training sessions and created Alpha and Beta Versions.

Project: Pepsi Factory Data Analyzer

Worked on:

- Showed **live data information** on graphs using the Graph and Chart Unity Asset.
- Added daily, weekly, monthly, and yearly **filters and generation algorithms** to generate reports of data.

Tool & Technologies:

Unity 3D

C#

Unity ML-Agents

[Graph and Chat](#)

Co-Founder & Game Developer at Zamunga Games Lahore, Pakistan

Dec 2016 – Apr 2018

Project: Intelligent Traffic System with highly optimized ITS visually and performance-wise.

Project: Stealth & Chasing AI that can chase stationary and moving Destinations performing stealth unique actions to surprise the Player with even uneven terrain.

Project: Game Missions Engine for all missions handling, created a mission controller with 6 generic tasks to build rapid games by designers.

Tool & Technologies:

* Unity 3D

* C#

* Realistic Car Controller

* Realistic Tank Controller

* InVector

* Weapon system

Casual Game Developer at ForLoop Technologies Lahore, Pakistan

Dec 15 – Nov 16

Project: Summer Vacation Party – a 2D casual game. Implement sprite animations and cutout interaction

Project: Cooking Party – 3D casual game from scratch, to be ready to publish

Tool & Technologies:

Unity 3D

C#

PlayMaker

Internship at Fate Softworks Lahore, Pakistan

Apr 15 – Sep 15
